## Oxley High School Media Consent Form

Dear parents/caregivers,

During your child's time at Oxley High School there will be times where your child could be photographed or filmed in an educational or promotional context. As Oxley High School rises to meet the needs of a more technology based society it becomes increasingly important to recognise information privacy rights regarding publication of media involving your child. Oxley High School requires parental permission to use and publish images and or film for general educational purposes. Student welfare is our primary concern at all times in delivering local Quality Teaching and Learning.

These purposes could include (but are not limited to) publication in school newsletters, Quest magazine, local newspaper articles, general exhibitions at school events, school website, radio, television and news media as approved by the school, school displays and participation within the connected classroom environment.

Oxley High School's Connected Classroom presents a unique opportunity for students to participate in video conferencing and virtual excursions within the classroom. As a Centre for Excellence, Oxley High School has a partnership with the University of New England which may involve specific lessons, being monitored and recorded in order to improve the quality of pre-service teachers and provides an opportunity for experienced practitioners to share their teaching practice skills.

As we integrate technology into every day practice at Oxley High School, it is important to implement a system of email correspondence to send important information regarding your child and upcoming events within the school. The further aim of this email system is to establish another vehicle for effective parent communication, including the opportunity for parents or teachers to request interviews regarding their child's progress.

Please feel free to contact the school at any time should you have any concerns or queries regarding media permission. For changes in circumstance, including change of email address or circumstances that may be cause for withdrawal of media consent, please submit changes in writing to the front office so that records can be adjusted accordingly.

Please complete the consent form below so that your child may be included in any forms of educational filming, photography and or participate within the Connected Classroom using virtual technology.  
Yours sincerely,

Mr Simon Bartlett-Taylor  
Principal
